PROFESSIONAL SUMMARY

Data Analyst & BI professional with 2.8 years of experience delivering SQL-driven analysis, KPI reporting, dashboard development, and data quality improvement in enterprise environments. Proven track record of cross functional reporting, building Power BI dashboards, and reducing turnaround time by 35% through scalable solutions and process improvements. Skilled in SQL, Power BI, Python, Excel, PL/SQL, and stakeholder-driven analytics, with experience translating business requirements into trusted, actionable insights.

TECHNICAL SKILLS

Business Intelligence & Analytics:	Business Intelligence, Data Analysis, KPI Reporting, Dashboard Development, Data Visualization, Business Performance Reporting, Data Profiling, Data Modelling, Root Cause Analysis, Operational Reporting, Data Privacy, Predictive Analytics
Tools & Technologies:	SQL, PL/SQL, Power BI, Excel, Python, Oracle Cloud, AWS Foundations, Amazon S3, Amazon RDS, Git, ServiceNow, AI/ML
Cross-Functional Delivery:	Requirements Gathering, Stakeholder Collaboration, Documentation, Process Improvement, UAT, Defect Triage, Agile, Scrum, Jira, Confluence, RCA
Strengths:	Analytical Problem Solving, Structured Communication, Ownership Mindset, Attention to Detail, Continuous Improvement, Adaptability in Fast-Paced Environments, Strong Decision Making

PROFESSIONAL EXPERIENCE

Business Analyst

Cognizant Technology Solutions | December 2021 – July 2024

Business Intelligence & Reporting

- Engineered 10+ real-time Power BI dashboards to improve visibility into customer segmentation, billing accuracy, and service lifecycle KPIs, reducing C-level reporting delays by 35%.
- Analyzed 2M+ telecom customer records using SQL-based data profiling to identify anomalies, cleanse input datasets, and strengthen reporting accuracy, improving billing accuracy by 22% over three quarters in a large-scale telecom billing environment.
- Optimized SQL queries and backend reporting logic to improve dashboard refresh reliability and reporting performance, strengthening the consistency and usability of recurring KPI reports for internal stakeholders.

Data Quality, Metrics & Process Improvement

- Refined data definitions and reporting logic in collaboration with Product and Engineering teams to improve metric consistency across modules, increasing stakeholder trust in business reporting and supporting more reliable interpretation of performance trends.
- Diagnosed recurring billing discrepancies through root cause analysis and supported corrective logic enhancements within two release cycles, improving data integrity and reducing recurring reporting issues in downstream processes.
- Investigated 150+ ServiceNow incidents to uncover systemic data gaps, implement data fixes, and recommend workflow redesigns, reducing ticket recurrence by 18% and improving operational reporting quality.

Automation & Operational Efficiency

- Automated 10+ recurring data maintenance tasks using Shell scripting and PL/SQL, increasing operational efficiency by 40% and reducing manual workload across recurring support and reporting activities.

- Collaborated with third-party vendors to support backend reporting module integration using PL/SQL, enabling reporting support for 1M+ customer data ingestion events daily and improving alignment between source data and reporting outputs.

Cross-Functional Collaboration & Delivery

- Led refinement of 40+ user stories and epics through Jira and Confluence to maintain traceability of business and data requirements, improving alignment between stakeholder needs, reporting outputs, and sprint execution.
- Partnered with Product Owners, Legal, QA, and DevOps teams to define acceptance criteria for 25+ stories and support business acceptance testing, achieving greater than 95% stakeholder approval across delivered changes.

Business Analyst Intern

LitsBros Pvt. Ltd | August 2021 – October 2021

- Developed SQL-driven data models and Excel dashboards to track student performance KPIs, improving academic review timelines by 25% and giving stakeholders faster access to structured performance insights.
- Automated recurring batch and reporting processes to reduce manual effort by 40%, improving process reliability and turnaround time for operational reporting tasks.

PROJECTS

Sustainable Supply Chain Analytics – ESG Strategy & Reporting

- Researched the use of AI, blockchain, and big data architectures for ESG compliance reporting in FMCG and pharmaceutical sectors, proposing a scalable data governance framework to address regulatory risk, cross-border reporting integrity, and performance measurement standardisation.

FlareCare.AI – GenAI Wellness Companion

- Defined data and privacy requirements for a GenAI-powered health journaling platform, applying healthcare data governance principles, including awareness of HIPAA-aligned data handling, consent frameworks, and sensitive health data classification, to translate user research into structured analytical requirements supporting predictive health pattern recognition.

EDUCATION

Master's in Business Analytics

University of Galway, Ireland | September 2024 – September 2025

Master of Computer Applications

Government College of Engineering, India | June 2019 – October 2021

CERTIFICATIONS

- Oracle Cloud Data Management Foundations Certified Associate
- Oracle Cloud Infrastructure Foundations Certified Associate
- Business Analysis Professional (BAP) Certification
