

SHUBHAM KANSE

Software Engineer

Ireland | +353 899775080 | shubham.kanse@hotmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with 3.5+ years of experience designing and developing scalable backend solutions in FinTech and cloud-native environments. Specialized in Java, Spring Boot, and secure RESTful services within microservices and event-driven architectures. Proven success reducing system latency by 75%, boosting API adoption by 40%, and developing robust applications supporting 5M+ transactions daily. Specialized in deploying high-performance backend systems through clean code, modular design, and test-driven development. Brings advanced academic grounding in AI/ML with real-world engineering execution, thriving in agile, globally distributed teams.

TECHNICAL SKILLS

Programming Languages:	Java, Python, SQL, C++, C#
Backend Frameworks:	Spring Boot, REST, GraphQL, OAuth2, JWT
Architecture:	Microservices, Event-Driven Systems, Kafka, Cafex
Databases:	MySQL, PostgreSQL, MongoDB
Security & Testing:	OAuth2, JWT, TLS, JUnit, Mockito, TestContainers, TDD, BDD, SAST, DAST
Cloud Platforms:	AWS (Lambda, S3, EC2)
Dev Practices:	Agile, Scrum, Secure SDLC, API Design, Code Reviews
AI/NLP Tools:	FastAPI, Scikit-Learn, BERT, ELECTRA, Sentiment Analysis

PROFESSIONAL EXPERIENCE

Software Engineer

Fiserv | May 2021 – July 2024

Enterprise-Scale Java Microservices Development

- Engineered backend microservices in Java 17/21 and Spring Boot, processing 5M+ secure transactions daily across financial platforms with 98%+ uptime.
- Re-architected monolithic modules into event-driven microservices using Kafka and Cafex, achieving 75% reduction in latency and 60% throughput gains within 6 months.

RESTful API Engineering & Backend Integration

- Designed and developed 50+ secure REST APIs with OAuth2/JWT, achieving <0.5% post-deployment error rate and decreasing partner onboarding time by 20%.
- Integrated APIs into third-party systems, enabling seamless service adoption and driving 40% increase in client platform integration.

Agile SDLC & Developer-Led Testing Culture

- Championed TDD and modular code design, boosting unit test coverage by 40% and lowering production defects by 35%.
- Led threat modeling sessions and secure code reviews across teams, cutting vulnerabilities by 35% while maintaining sprint velocity.

Cross-Functional Collaboration & Global Teaming

- Collaborated with globally distributed teams across Ireland, India, and the US, shipping high-availability services and features in bi-weekly Agile sprints.
- Mentored junior developers on design principles and test strategies, resulting in measurable improvements in code quality KPIs and team velocity.

Performance Optimization & System Refactoring

- Transformed synchronous MQ-based architecture to HTTP-based Cafex interfaces, improving user experience and enabling modular deployments.
- Refined API response times through asynchronous data flows, lessening average response latency from 1.5s to under 400ms.

Software Engineering Intern

Digitech Controls & Systems | September 2019 – October 2019

- Developed RESTful services using Core Java and SQL, contributing 80%+ unit test coverage.
- Drove Agile development cycles, delivering CI-ready features and integrating TDD practices.

EDUCATION

MSc in Computer Science (Artificial Intelligence)

University of Galway, Ireland | September 2024 – September 2025

Thesis: “Online Misogyny Detection using API-Based Auto Augmentation” (Python, BERT, ELECTRA, FastAPI, NLP)

BE in Electronics & Telecommunication

Pune Institute of Computer Technology, India | August 2016 – October 2020

PROJECTS

Payment Gateway Backend System

Java, Spring Boot, OAuth2, Microservices

Designed secure transaction modules mimicking real-world banking interactions with modular service orchestration under PCI principles.

Movie Recommendation System

Python, NLP, Sentiment Analysis

Developed intelligent recommender using sentiment scoring and preference analysis; generated personalized film suggestions using user reviews.
